

# WE ARE AIRFLOW

Your compressed air and  
gas generation specialist.

**AIR FLOW**  
COMPRESSORS & PNEUMATICS LTD

# HERE FOR YOU

We are a market leading supplier of complete compressed air system solutions providing highly professional and competitive services for over 25 years.

We support a wide range of industries such as automotive, pharmaceutical, oil & gas and manufacturing with comprehensive compressed air and gas generation solutions.

Our knowledge and vast experience allows us to offer simple and effective solutions for all of your compressed air needs.

At AirFlow, we have over 100 years combined experience in the compressed air industry and can offer expert advice and services.

We can support you with market leading manufacturers such as: Alup, Pneumatech, AIRnet, and much more.

We also cover a wide variety of other products which include: nitrogen & oxygen gas generators and piping systems.

Please contact us for any further information and advice.

## FIRST IN MIND FIRST IN CHOICE

Whether it's for automotive, energy production, manufacturing, engineering, pharmaceuticals or the food processing sector, there's a compressed air and gas generation solution readily available from AirFlow.

Our proven technology, knowledge and expertise makes us the perfect choice to support our customer needs, first time, every time.

## OUR SERVICES

- ✓ Consultation & Design
- ✓ Supply & Installation
- ✓ Maintenance Packages
- ✓ Equipment Repair
- ✓ Equipment Hire
- ✓ Air Leak Surveys
- ✓ Energy Consumption Audits

# OUR SERVICES

We specialise in all aspects of our product range from initial consultation to design, supply and installation followed by a lifetime cover competitive maintenance package. The solutions we offer can be tailor made to suit our clients' varying requirements and specifications.

## Consultation & Design

Our experts offer you a piece of mind when it comes to planning and designing your next project. We have hands on experience in supporting our customers from manufacturing, food & beverage to energy and oil & gas industries.

## Supply & Installation

We carry a wide range of compressed air and gas generation products including accessories and ancillary equipment such as dryers and receivers to match your specification needs.

We also have a large stock of used/re-conditioned compressors and associated equipment.

Our engineers are trained to carry out installations of new equipment to provide you with a one stop shop solution.

Our dedicated pipe fitting team are highly experienced and able to help with anything from small modifications to a complete distribution system using various pipework systems.

Our chartered engineers are fully qualified and certified to carry out Written Schemes of Examinations assisting you to comply with the Pressure Systems Safety Regulations.

## Maintenance Packages

AirFlow offers competitive bespoke maintenance packages tailor made to suit our customers varying requirements. Our service plans are designed to provide increasing levels of service, quality and reliability with an option to spread the annual cost over weekly, monthly quarterly or annually payments.

## Equipment Repair

AirFlow strives to ensure that all urgent breakdowns are responded to quickly and a resolution found to minimise downtime. We operate a 24/7 service 365 days per year to ensure that all of our customers receive the best possible response times.

## Equipment Hire

AirFlow offers a number of air compressor hire and leasing packages for customers who require a temporary or long term air compressor system. We carry stock of all compressed air equipment both electric & diesel from 1.5kW – 160kW which can help in breakdowns, or temporary projects.

## Air Leak Surveys

Having air leaks on your air supply system is costly and can lead to further inefficiencies or quality problems. AirFlow technicians are here to conduct surveys when you are having problems with air pressure to detect and to fix any air leaks found.

## Energy Consumption Audits

Our team of experts understands that energy is a significant cost to your production site. We offer energy consumption audits that can help you take control of your energy costs, and we can provide alternative products and solutions that will help you save money and reach your sustainability goals.

# OUR HOME BRANDS

AirFlow is proud to represent the world's foremost brands in compressed air and gas generation for sales, technical support and service.

**ALUP Compressors** has over 90 years of industrial experience. Their wide product range includes everything from simple professional applications to complete industrial equipment. With their products you can focus on your core business and rely on us for all aspects regarding your compressed air supply.

**Pneumatech** has provided industry-leading compressed air treatment and gas generation solutions to customers across the globe since 1966.

They pioneered external heat regenerative dryers, introduced variable speed technology on refrigerant dryers and pushed the energy efficiency of nitrogen and oxygen generators to the highest level.

Pneumatech's innovative products and solutions provide clean, dry air and gas to general industries as well as automotive, textile, power generation, oil & gas, food & beverage and electronics.

## OUR MISSION VISION & VALUES

What we stand for, what drives and inspires us.

**Our mission** is to achieve sustainable, profitable growth. In doing so, we endeavour to create lasting value for our customers, whilst safeguarding people and helping to tackle the challenges of climate change.

This means innovating with a long-term, ethical perspective and supporting our customers to meet their sustainability ambitions. It also means taking continual steps to minimise the environmental impact of our operations and products, ensuring that our employees are safe and healthy and that our business runs efficiently.

**Our vision** is to be recognised by our customers and industry stakeholders as being 'First in Mind - First in Choice' for compressed air solutions.

**Our core values** are: respect; interaction; innovation; and commitment. These determine how we strive to behave as a team internally and in our relationships with customers and other stakeholders.

## KNOWLEDGE HUB

Our **Knowledge HUB**, is designed to showcase the latest innovations in both compressor and gas generation technology.

As well as providing technical training from our team of product specialists, the Knowledge HUB is a dedicated space to demonstrate our new products and solutions.
